# **CEO COMMENTS**

The Group's development has been positive also during the fourth quarter. The fourth quarter orders showed an organic growth of around 9 per cent excluding currency impact. During the fourth quarter we have again received several important orders from customers within automation, warehouse and property, and have also during this quarter, similar to the past quarter, experienced lower activity within the automotive sector. In terms of order intake, this can mostly be seen in the North American operations which during the fourth quarter had significantly lower orders from automotive. Reduced activity in the automotive sector during the recent years has resulted in this area now accounting for only 10-12 per cent of our sales. Despite this fact we have still managed rather good growth. We have especially received important orders in our operation in the UK which shows strong growth figures for the quarter.

We have continued to devote a great deal of time and effort to the integration and improvement of our Folding Guard entity in Chicago. We can conclude that it takes longer time than expected to change culture and attitude to customer requirements, but the changes are now starting to come and we can concentrate more on increasing the efforts in marketing and sales. The market conditions in the US have during the fourth quarter been good and we can find a good development for the Troax brand. Steel prices have been stable during the quarter.

Our assessment for this quarter is that the market has grown approximately as expected. The indication is still that the order books of our customers are well filled and their investment in our solutions is high but that the market growth now has levelled out on a continued high level. The development for the Group has been positive in most markets and our assessment is that we are continuing to take market share on many regions. The orderbook at the end of the quarter is on a satisfying level and to some extent higher than what we usually have at the end of a year.

During the fourth quarter of 2018, production of Troax products commenced in our Chicago factory. This results in shorter lead times and better service levels to US customers. This also results in an improved environmental performance as our emissions of CO2 are reduced by this change. We have also invested in a completely new production line for panel manufacturing in the Group's main unit in Hillerstorp. This plant is now operating in test mode and is expected to reach full production speed during the first half of 2019.

Sales increased in the quarter by 6 per cent compared with the same period last year (including currency the increase is 8 per cent). The progress has been positive especially in the continental Europe, UK and New markets.

With this volume increase, the result for the quarter is better than last year. We have a continued good apacity utilisation in our facilities in Hillerstorp, Sweden and Calco, Italy. The operating result for the quarter was 10,1 (8,3) MEUR, which corresponds to a profit margin of 23,2 per cent to be compared with 20,2 per cent last year. The consolidation of Folding Guard still decreases the margin in percentage terms. We do however see clear possibilities to increase the margin also for Folding Guard long term. The Net result amounts to 7,9 MEUR for the quarter compared to 4,1 MEUR last year. The increase is mainly due to the higher EBIT and a lower tax expense. Earnings per diluted share for the fourth quarter is 0,39 EUR to be compared with 0,21 EUR in the same quarter of 2017.

Working Capital is on an expected level where accounts receivables have increased somewhat due to the increase in sales whereas inventory is on a continued desired level. Cash flow from operations is higher than the same period last year. The investments was 2,7 MEUR for the quarter and 8,9 MEUR for the full year. The key figure of our net debt in comparison with the 12-month rolling EBITDA is now 1,3 which clearly is below our target for the Group. As a result of the good sales development, the Group has decided to expand its machine capacity in our operations in Italy. This will happen during 2019-2020 and the size of the investment is approximately 4-5 MEUR.

# THE GROUP SUMMARY

# **OCTOBER - DECEMBER**

Total Order intake developed positively during the quarter. Order intake amounted to 41,7 (38,4) MEUR, an increase by 9 per cent or 9 per cent adjusted for currency. All regions except for North America increased their order intake compared with the same period last year.

Net sales amounted to 43,5 (41,0) MEUR, an increase by 6 per cent, or 8 per cent adjusted for currency and an IFRS 15 adjustment. All regions except North America increased their net sales compared to the same period last year.

Operating result amounted to 10,1 (8,3) MEUR, corresponding to an operating margin of 23,2 (20,2) per cent.

# **JANUARY - DECEMBER**

Total order intake developed positively during the period. Order intake amounted to 165,0 (152,0) MEUR, an increase by 9 per cent or 11 per cent adjusted for currency. All regions increased their order intake compared with the same period last year.

Net sales amounted to 161,0 (152,1) MEUR, an increase by 6 per cent, or 8 per cent adjusted for currency and an IFRS 15 adjustment. All regions increased their net sales compared to the same period last year.

Operating result amounted to 32,8 (30,6) MEUR, corresponding to an operating margin of 20,4 (20,1) per cent.

#### FINANCIAL NET

Financial net was -0,1 (-0,3) MEUR in the quarter and -0,8 (-5,2) MEUR for the year. The decrease compared to last year is related to the redemption of the bond that took place in the second quarter of 2017 which rendered a one-time cost of -2,3 MEUR.

## **TAXES**

Taxes increased to -2,1 (-3,9) MEUR in the quarter and -7,6 (-8,4) MEUR for the year. The cost for income tax was in the fourth quarter of last year impacted by -2,2 MEUR due to a reduction of corporation tax in USA from 35% to 21% and is related to a decrease in deferred tax assets that arose in conjunction with the acquisition of Folding Guard.

#### **NET RESULT**

Net result for the quarter amounted to 7,9 (4,1) MEUR and 24,2 (17,0) MEUR for the year. The increase is mainly related to increased sales and a lower expense for interest and income tax which is described above.

## CASH FLOW, WORKING CAPITAL AND NET DEBT

Cash flow from operating activities was 8,8 (7,2) MEUR in the fourth quarter and 26,0 (18,7) MEUR for the year. Net debt was 46,3 (54,5) MEUR at the end of the period. Net debt in relation to the 12-month rolling EBITDA was 1,3 (1,6) to be compared with the company's financial targets of less than 2,5.

## **INVESTMENTS**

In the quarter the investments were 2,7 (1,9) MEUR and for the year the Group has invested 8,9 (2,8) MEUR. This year's investments are primarily related to investments in machinery.

# **REGIONAL DEVELOPMENT**

Troax operations are reported as one segment. As secondary information Order intake and Sales are reported based on geographical regions.

Nordic – Sweden, Denmark, Norway and Finland
Continental Europe – Europe excluding Nordic and United Kingdom
United Kingdom – Great Britain and Ireland
North America – US and Canada
New Markets – rest of the world including all distributors directly connected to Sweden

In the geographical compilation of the order intake and sales of the Group, North America is from Q1 2018 reported as a separate market region, as it is an important part of the Group's operation.

## **ACCOUNTING PRINCIPLES**

This interim report has been prepared in accordance with IAS 34, Interim Financial Reporting, the Annual Accounts Act and the Swedish Financial Reporting Board recommendation RFR 2, Accounting for Legal Entities. The Accounting principles that have been applied coincide with those accounting principles used for preparing the latest Annual Report. The Annual report for 2017 is available on <a href="https://www.troax.com">www.troax.com</a>, with the following additions.

IFRS 9, Financial instruments. The Group applies since the 1<sup>st</sup> of January 2018 IFRS 9 Financial instruments. The Group applies the simplified approach for bad debt reservations regarding accounts receivables, i.e the reserve will correspond to the expected loss over the entire life of the receivable. The implementation of IFRS 9 has not had any material impact to the financial statement of the Group due to the historical low cost for bad debt and the assessment is that the credit risk remains low.

IFRS 15, Income from agreements with customers, is applied since the 1<sup>st</sup> of January 2018 IFRS 15 income from agreement with customers where the accounting principles were presented in the annual report for 2017. The implementation of IFRS 15 has led to a change in the Group's accounting policy which is applied with forward-looking retroactive effect. The changed accounting policy has affected the opening equity 2018-01-01 positively by 0,7 MEUR, corresponding to 0,9%.

#### Preparations for new accounting standards

IFRS 16, Leasing, requires that assets and liabilities attributable to all leases, with some exceptions, are reported in the balance sheet. The view is based on the lessee having a right to use an asset and at the same time an obligation to pay for this right. Some of the Group's commitments are covered by the exception for short contracts and contracts of lesser value. The implementation of IFRS 16 will entail a change in the Group's accounting principle, which will be applied with retroactive effect. This means that a recalclation of the opening balance will take place as of 2019-01-01. The changed accounting principle will lead to that tangible fixed assets as well as long and short term liabilities will increase by approximately 7 MEUR as of January 1st, 2019, or by 3,5% of the total assets. The equity ratio will fall from 43,1% to 41,6% and the implementation of IFRS 16 will have a limited positive impact on EBIT.

#### **ALTERNATIVE KEY RATIOS**

In this interim report, Troax presents certain financial measures that are not defined by IFRS, so-called alternative key ratios. The Group believes that these measures provide valuable supplementary information to investors as they enable an evaluation of the company's results and position. Since not all companies calculate financial measurements in the same way, these are not always comparable to those used by other companies. Investors should consider these financial measures as a complement rather than an IFRS financial statement.

#### RISK AND RISK ASSESSMENT

Exposure to risk is a natural part of business activity which is reflected in the Troax approach to risk assessment. The aim is to identify and prevent and reduce the risks and limit the damages these risks might cause. The most essential risk for the Group is related to how the general business cycle effects demand. For further information, see the Annual report 2017 note 24.

## **SEASONAL VARIATIONS**

Seasonal variations have some impact on Troax business. Sales are normally in general stable between the quarters, but can fluctuate between the months in the quarter. Sales can be somewhat lower in the summer months (July-August) and from December to January. In periods of high production, the company normally ties up more money in Working Capital. Cash is then released from working capital after a high season when manufactured goods are installed and the customer's receivables paid.

## TRANSACTIONS WITH RELATED PARTIES

No significant transactions with related parties has taken place during the period.

# **CALL OPTION PROGRAM FOR SENIOR EXECUTIVES**

At the Annual General Meeting in 2018, a share-based incentive program was decided based on call options for the CEO, senior executives and certain other key employees within the Group. The program comprises 105,000 options, of which 37,000 were subscribed for at a subscription price of SEK 29. The vesting date for the warrants is from 20 May 2022 to 30 June 2022.

# **EMPLOYEES**

At the end of the period the Group had 707 (673) employees.

# OTHER EVENTS DURING THE QUARTER
